Your backup folder MIGHT be visible to the public

To correct this issue, move the .htaccess file from wp-content/plugins/wp-dbmanager to /home/web74635/domains/owenlaws.se/public_html/wordpress/wp-content/backup-db

Configure Header Area

Choose from 10 header items to arrange a custom header area:

%pages

The horizontal drop down menu bar for "Page" pages

%page-center

Like above but centered. Note: There's no S in this tag. It's **not** %pageS-center

%page-right

Like above but right-aligned. Note: There's no S in this tag. It's **not** %pageS-right

%cats

The horizontal drop down menu bar for categories

%cat-center

Like above but centered. Note: There's no S in this tag. It's **not** %catS-center

%cat-right

Like above but right-aligned. Note: There's no S in this tag. It's **not** %catS-right

%logo

The logo area, including the logo icon, the blog title & description, the search box and the RSS/Email icons

%image

The rotating (or static) header image with the (optional) opacity overlay left & right and an (optional) overlaid blog title & blog tagline

%bar1

A horizontal bar, to be used as decoration on top, bottom of between header items. Can be used multiple times.

%bar2

A second horizontal bar, that can be styled differently. Can be used multiple times.

You can style and configure these header items individually further down on this page, and on the menu tabs [Page Menu Bar](#) and [Category Menu Bar](#).

This section here is just for the overall configuration of the header area.

List the header items you want to display, in the order you want to display them.

Examples:

%image %bar1 %logo %bar1 %pages

%pages %image %cats

%bar1 %logo %cats %bar2 %pages %bar1

%logo %image %bar2 %pages

Default: %pages %logo %bar1 %image %bar2

Logo Area: Styling

Style the header's logo area. The logo area is the container that holds the logo / logo icon, the blog title, the blog tagline, the search box and the RSS/Email icons. The height of the logo area will be determined by its content. If you want more height, set the height here. You can set the height, borders and the background. Avoid margin and padding for this container – it's a table.

Example:
height: 150px;

WP 2.7 Bytes For All

Just another WordPress weblog making this long to see how it wraps in the header

CSS & Javascript

Configure CSS & JS

background: #eeeeee;
border: solid 1px #000000;

height: 80px;

Default: blank

Show Logo Image?

maskros1,6px.png

Default: logo.png

Show a logo in the logo area? Leave blank to show no logo. To test this, put huge-logo.gif here and set both "Show Blog Title" and "Show Blog Tagline" to "No" below.

Logo Image: Styling

Style the logo here, i.e. give it a border or move it around by applying margins.

Example:

margin: 30px 30px 30px 30px;

margin: 0 10px 10px 0;

Default: margin: 0 10px 0 0;

Show Blog Title?

Yes

Default: Yes

You can remove the blog title, i.e. if you want to have just a (bigger) graphical logo instead of a small logo icon plus the blog title in HTML. If you set this to "No" you'll probably want to remove the Blog Tagline as well (see below)

Blog Title

Style the blog title font except the color and font-weight (= next options).

margin: 0;
padding: 0;
letter-spacing: -1px;
line-height: 1.0em;
font-family: tahoma, arial, sans-serif;
font-size: 240%;

Default: margin: 0; padding: 0; letter-spacing: -1px; line-height: 1.0em; font-family: tahoma, arial, sans-serif; font-size: 240%;

Blog Title: Font Weight

bold

Default: bold

Make blog title bold or not.

Blog Title Color

666666

The blog title default color.

Default: 666666	
Blog Title Color: Hover 000000 Default: 000000	The blog title hover color.
Show Blog Tagline? ☒ Yes ☐ No Default: Yes	You can remove the blog tagline here. The blog tagline is the short blog description under the blog title. It can be set at Settings -> General -> Tagline.
Blog Tagline Style the blog tagline. <pre>margin: 3px; padding: 0; font-size: 1.2em; font-weight: bold; color: #666666;</pre> Default: margin: 0; padding: 0; font-size: 1.2em; font-weight: bold; color: #666666;	
Show search box? ☒ No ☐ Yes Default: Yes	You can remove the search box from the header here. <i>To put a search box into one of the sidebars, go to Site Admin -> Appearance -> Widgets, and add the "Search" widget to one of the sidebars.</i>
Search box Style the searchbox in the header. <pre>border: 0; width: 300px; margin: -8px -10px 5px 0px; padding: 0;</pre> Default: border: 1px dashed #cccccc; border-bottom: 0; width: 200px; margin: 0; padding: 0;	
Text in header search box Skriv här + tryck Enter eller Skift för att söka Default: blank	Show pre-filled text in the header search box, such as Type + Enter to search ?
Horizontal Bar 1: Styling 2 (empty) horizontal bars are available, both of which you can style differently and use once or multiple times as additional styling elements for the header area. These bars will span the whole layout width. You can style their background color, height and all 4 borders (top, right, bottom, left).	

```
height: 10px;
background: #ffffff;
border-top: solid 1px #cccccc;
```

Default: height: 5px; background: #ffffff; border-top: dashed 1px #cccccc;

Horizontal Bar 2: Styling

Style the 2nd horizontal bar here. You can use each one of these bars multiple times (or not at all).

```
height: 5px;
background: #ffffff;
```

Default: height: 5px; background: #ffffff; border-bottom: dashed 1px #cccccc;
